PROFESSIONAL SUMMARY

BTech graduate in Artificial Intelligence and Machine Learning with hands-on experience in Python, machine learning, data analysis, and web application development. Skilled in developing machine learning models, NLP-based applications, and data-driven solutions using Python and modern AI/ML frameworks. Familiar with REST API development, databases, and software development practices. Passionate about building practical, scalable solutions and continuously improving technical skills in Software Development, Data Science, and AI/ML.

EXPERIENCE

Artificial Intelligence with Cloud Computing Intern

01/2026 – 05/2026

SuprMentr Technologies Pvt Ltd

- Engaged in training and project work focused on Artificial Intelligence and Cloud Computing concepts.
- Applying machine learning and cloud fundamentals through assessments, live training, and capstone activities.
- Strengthening knowledge in intelligent systems, deployment concepts, and industry-oriented AI applications.

Android App Development using Gen AI Intern

01/2026 – 05/2026

MindMatrix.io

- Contributing to Android application development using Generative AI concepts and product-based learning modules.
- Supporting feature implementation, application testing, and technical documentation in collaborative development tasks.
- Working on practical projects involving AI-driven application development and cross-functional problem solving.

Capgemini Intern, EduBridge

10/2025 – 01/2026

- Engaged in practical training on AI/ML concepts, Python development, and data-driven application building.
- Working on project assignments involving machine learning workflows, preprocessing, and model experimentation.

EDUCATION

B.E in Artificial Intelligence And Machine Learning, Visvesvaraya Technological University

Bangalore, Karnataka
2022 – 2026

- Score: CGPA 7.8

12th, KHMHS School

Malappuram, Kerala
2020 – 2022

- Score: 86%

10th, KHMHS School

Malappuram, Kerala
2019 – 2020

- Score: 99%

SKILLS

Programming Languages:

Python, SQL, Java, C++

AI/ML Frameworks:

NumPy, Pandas, Scikit-learn, TensorFlow

Web/Deployment:

HTML, CSS, JavaScript, Flask, REST APIs

Machine Learning:

Deep Learning, NLP, Model Development

Databases:

MySQL, PostgreSQL, MongoDB, Firebase, NoSQL

Data & Visualization:

Power BI, Tableau, Matplotlib, Seaborn

PROJECTS

Advanced Classifiers And Feature Reduction For Accurate Insomnia Detection

- An Insomnia Detection Project uses machine learning to analyze sleep patterns and behavioral data to identify signs of insomnia: It helps in early diagnosis and monitoring of sleep disorders for better health management.

Artificial Intelligence With Cloud Computing - Music Genre Classification Using Machine Learning

- Built an intelligent music genre classification system using machine learning and audio feature extraction techniques.

Multi-Lingual Chatbot(ML)

- Design and implementation of chatbot using machine learning algorithms, aimed at providing effective and intelligent conversational support across various languages.

CERTIFICATIONS

Project Completion Certificate - Microsoft

Time Management Course Completion Certificate - Infosys

Business English Course Completion Certificate - Infosys

Completion Of Skill Development Workshop On Generative AI - Kodr

Digital 101 Journey Certificate - Nasscom
